

Use the science dictionary on your ipod touch to help you the journal questions.

# Water, Water Everywhere

Did you know the water you drink out of the faucet has been around for millions of years? Learn about the water cycle through videos, creating a comic, writing your own script, and creating your own movie.

| Beginner                                                                                                                                                                                                                                                                                                         | Intermediate                                                                                                                                                                                                                            | Expert                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
